PROFESSIONAL SUMMARY

Goal-oriented Electronics and Computer Science Engineer with an 8.60 CGPA and practical experience in frontend development, strategic planning, and data visualization. Skilled in converting intricate technical specifications into user-friendly digital products, given my involvement in highly influential group projects related to LegalTech software and enterprise management systems.

EXPERIENCE

Assistant Quality Analyst Intern | Sociochat Communications Pvt. Ltd. (Nov 28 – Dec 29, 2025)

- Collaborated with cross-functional teams to conduct comprehensive pre-release software testing.
- Developed a methodical approach to quality assurance, demonstrating strong communication and professional skills in a fast-paced environment.

PROJECTS

Technix Timesheet Management System (Client Project | Live)

- Developed a production-ready timesheet system using **React (TypeScript)** and **Supabase**
- Built dashboards for work logging, analytics, and automated Excel reporting
- Deployed for real-time usage with structured data processing and client accessibility

Seattle Desi Broadcasting Platform (Live Web Project)

- Built a responsive **React-based web application** with **modern UI/UX practices**
- Optimized performance and ensured smooth experience across devices
- Deployed live for real-time accessibility and user interaction

Buildify – Digital Agency Web Platform

- Designed and developed a modern multi-page website using **HTML, CSS, and JavaScript**
- Implemented responsive UI with clean design and structured navigation
- Focused on user experience and high-conversion layout design

MessXchange – Smart Mess & Credit Management System

- Developed a **Flutter & Firebase** mess management app featuring a credit-based meal tracker and an automated wallet refund system for skipped meals.
- Engineered a secure QR entry system utilizing 60-second dynamic codes and custom transaction logic to prevent screenshot fraud and duplicate scans.
- Built a real-time admin dashboard using optimized Firestore streams for live tracking of daily meal attendance and student transactions.

Telecom POS & Digital Ledger (Flutter | Deployed in Retail Store)

- Developed an offline-first Android POS application using **Flutter** for sales, expense, and inventory management
- Implemented **Hive (NoSQL)** for fast local data storage, enabling zero-latency and full offline functionality
- Automated Excel report generation, reducing end-of-day reconciliation time by ~90%

SKILLS

Programming Languages: Python, Java (OOPs), C / C++

Frontend Technologies: HTML, Tailwind CSS, JavaScript, React

Backend Technologies: Node.js, Firebase, MongoDB, SQL

CS Fundamentals: Operating System, Data Structures (Java)

Tools: GitHub, Git bash, VS Code, Vercel, Canva, Android Studio, MS Office

Soft Skills: English Communication, Presentation, Public Speaking, Leadership

CERTIFICATIONS

- Data Science with Power BI – 10 Days Internship, ECS Department (June 2025).
- QueryCraft: The Art of Database Engineering – IEI-SAKEC & MITU Skillologies (Dec 2025).

EDUCATION

Shah & Anchor Kutchhi Engineering College
B.Tech in Electronics & Computer Science (CGPA : 8.60 / 10)

September 2024 - Present
Mumbai
